

A step by step guide on how to invest in ILSI

The "Invest Like Stakeborg Index" (or **ILSI**) is an index which seeks to provide investors macro and diversified exposure to the main narratives that stand out as opportunities in the crypto space.

stakeborgdao.com/ilsj

Step 1 Installing Metamask

- Go to metamask.io
- Click "Download Now"
- Click "Add to Browser" (I.e. Chrome, Firefox)
- Click "Add extension"

You will know Metamask has been installed when you see the fox logo on the upper right hand corner of your browser.

Step 2 Using Metamask

One of the first tasks you will want to do on Metamask is to install a wallet (or "vault" as Metamask calls it) to hold your cryptocurrencies. **To do this, follow the instructions below:**

- Click on the Metamask logo in the upper right hand corner of your browser;
- Agree to the terms and conditions. You may have to agree to 2 to 3 pages worth of terms;
- Enter a password and click "Create" to create your wallet;
- You will see a set of 12 "seed words" for your vault. Click "Download this Secret Recovery Phrase" and store it safely since you will need it to access your vault. Also, you can write it down on paper to keep it safe offline too;
- Click "Next" once your seed words are secured and confirm the wallet creation by selecting the seed words in order.

Then you'll be taken into your Metamask wallet!

f. You are now in the right place, the **Ethereum Mainnet Network**.

Biggest Crypto narratives in one basket

Step 3

Go to stakeborgdao.com/ilsj and click on "INVEST HERE" - you'll be redirected to TokenSets' Invest Like Stakeborg Index Page. The image below shows the ten tokens that form our current investment strategy and the current value of one ILSI token.

Other Components

On the bottom of the page you can see ILSI's current **Marketcap**.

The **Streaming Fee** is 0.95% per year and it's the equivalent of a management fee from the traditional finance industry and it's based on the assets under management.

Unactualized Streaming Fee is the account where the streaming fee accumulates. The investment strategy manager can redeem this at any time he wants.

View Contract	0x0d6d...0A36	Zerion		
Contract Link	Manager Address	Performance		

Step 4 Ways to purchase ILSI

When you click on "BUY" you'll notice that there's two types of orders:

- One from TokenSets through the corresponding Smart Contract for ILSI
- One from DEX Swap (gets connected to a Liquidity Pool)

Method 1 Get ILSI Through TokenSets

In case the **tokens don't appear in Metamask**, **ILSI Token has to be imported by using the Set address** which can be found in the lower section of the page.

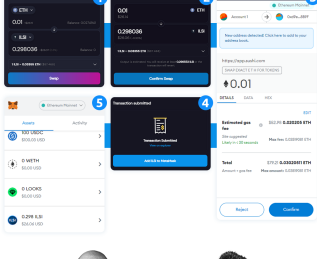

If you already own some of the tokens that are part of ILSI...

Then you can use the **issue window** in the **top right corner**. The tokens owned can be swapped for the equivalent value in the ILSI Token. For this you have to individually approve each token followed by another transaction which will change the proportions of each asset.

Method 2 Get ILSI Through SushiSwap

Go to [Sushiswap's ETH > ILSI Pool](https://sushiswap.com/ETH/ILSI) and follow these steps:

- Enter the amount of ETH you'd like to Swap into ILSI
- Confirm Swap
- Confirm again in Metamask
- You'll be notified to add the ILSI Token to your Metamask account - Click "Add ILSI to Metamask"
- Once the transaction is confirmed, check out your ILSI balance in Metamask.
